11th ANNUAL CONGRESS OF ESBS

Welcome Message from the Congress President:

It is my proud privilege and honor to invite you to the eleventh annual Conference of Egyptian Society for Bariatric Surgery to be held in Cairo, Egypt on the 13th - 15th October 2015.

The Egyptian Society for Bariatric Surgery (ESBS) was founded as a member Society of the International Federation for the Surgery of Obesity and Metabolic disorders (IFSO) in 1999. Bariatric surgery has enjoyed exponential growth in Egypt. The 11th annual meeting of the ESBS comes as a landmark meeting. The meeting has an international panel of experts, world-class middle east and Egyptian bariatric surgery experts and great original studies from Egypt to make the conference a true scientific gathering.

The ESBS 2015 conference is a comprehensive, multi-disciplinary forum where leading national and international experts will conduct a critical review. The Congress shall provide a platform to address and debate on the recent advances and challenges in the field of Metabolic and Bariatric surgery.

Egypt has a rich historic culture and hosts world famous tourists attraction sites. Join us at our conference and enjoy the rich deep culture of Egypt.

Professor Dr Khaled Gawdat

Congress President

Founder and Honorary president of the ESBS

Welcome Message from the ESBS President:

Egypt is a country with a great cultural background, thousands of years of history, huge productive populations and many tourists attractions gives Egypt a special place in the Middle East and the world. Egypt has just emerged from a cycle of political instability with a newly elected President and a stable government.

The ESBS was founded in 1999 to serve the bariatric surgery community in Egypt and the Middle East. The Eleventh annual meeting of the ESBS marks the return of a great bariatric surgery conference and the conference will have a great panel of international speakers, Middle Eastern experts, and experienced Egyptian bariatric surgeons. It is planned to be show and discuss results, controversies, and expert tips and tricks in the bariatric and metabolic surgery field. The conference is planned to be an excellent conference and it is our great pleasure to invite all bariatric surgeons in the region to attend our meeting.

Prof. Dr. Alaa Abbass Sabry
ESBS President

11th ANNUAL CONGRESS OF ESBS

Welcome Message from the Congress Secretary General:

Dear colleagues,

It is my pleasure to join the entire ESBS executive council along with the president of ESBS Prof. Dr. Alaa sabry Abbass in welcoming you to our 10th annual congress in Cairo.

This year program is committed to provide tools for bariatric professionals, whether established surgeons or those new to the field, to improve the quality of their practices. This year program contains two preconference courses to be held on Tuesday 13th of October. The scientific sessions will cover two and half days with a full track dedicated to integrated health professionals, abstract sessions and video sessions. A live surgery course will be held on Friday the 16th of October.

I look forward to seeing each of you here as we host our 11th annual meeting

Prof. Dr. Mohey ElBanna
Conference Secretary General

The Egyptian Society For Bariatric Surgery

About ESBS:

The ESBS is a non-profit Society; within this milieu, the Society's main goal is to advance the science bariatric surgery via motivating its members to achieve: Planned teachings and updating activity, supervise bariatric surgery programs in the area, and issue guidelines and certification for bariatric surgery practice. Establishment of an intimate society of the obesity surgeons who have a role in the advancement of the obesity surgery.

Establishment of guidelines for the use of bariatric surgery as treatment of metabolic disorder.

Help members to get exposed to the latest medical research and literature in the field of bariatric surgery.

Our goal is to spread enough knowledge about bariatric surgeries and, to help limit the spreading of obesity throughout Egypt.

The Egyptian society for bariatric surgery is responsible for:

Facilitating the communication between members.

All that concerns obese patients, information, care, and solutions.

Searching for new surgical techniques, developing existing ones.

Becoming a valued specialty society that serves the educational and professional needs of our members.

end-ball

System of intragastric balloon for NON SURGICAL
TEMPORARY treatment of obesity.

CE 0459

	Intragastric balloon technique
How it works	The intra gastric balloon acts by filling the stomach causing a feeling of satiety and reducing food intake. The treatment is associated with a balloon supported on the diet plan and behavioral.
Specifications	Possibility of the device on the endoscope, Non sterile, Single use, Biocompatible (finished product), Radio logically opaque (valve), 18 months of expiry date, Free Latex et Phtalates, compatible with an MRI, Pack in a box and a peel sachet, Delivered with all accessories (Extraction kit, syringe,) to be store in normal surrounding conditions.
Indications	Body Mass Index (BMI) > 30 kg/m ² , Before bariatric surgery for the « super obese (BMI > 50 kg/m ²)
Main risks of complications	Abdominal pain, nausea, Vomiting frequently the first day, Gastric perforation, Balloon migration leading to intestinal occlusion.
Treatment	~6 months
Intervention	20 to 30 minutes (under general anesthesia with or without intubation)
Extraction	30 to 90 minutes (under general anesthesia with intubation)
Hospitalization	1 Day(Check in the morning, Check out the evening)
Mortality intervention	0.06% à 0.1% (bibliographic data)
Weight loss expected	~16 kg(bibliographic data)

Placed on the endoscope
