Dear Colleagues and Friends,

In 2018 our traditional „Frankfurt Meeting“ as one of the top world meeting on the surgical and endoscopical treatment of obesity and metabolic disorders will once again be held here in our metropolitan city of Frankfurt, Germany!

Today we can proudly reflect on 20 years of science presentation and obesity expertise under the leadership of my father as president who first initiated the Frankfurt Meeting in 1998. My father and I have worked and pushed hard to establish what started as a local event to be recognized among the top medical meeting on the subject of obesity to this day.

Over the past 20 years we were very happy to have always welcomed and presented to you the world`s top experts on the subject of obesity treatment and also for the tradition of live surgery which we are especially proud of.

But as our event grew to it`s international importance of today, we have always emphasized a familiar conduct, personal relations and mutual understanding as the very spirit of the Frankfurt Meeting and the key to it`s success.

2018 will see my first presidency of the Frankfurt Meeting in succession of my father who will for his first time attend the meeting as an expert and honorary president. Together we will again do our utmost to ensure a high quality meeting on obesity science and live surgery.

Following the tremendous success of the past Obesity Days as a joint meeting of medicine and surgery we now want to return to our roots and lay our emphasis a new on surgery alone.

As in 2016 our meeting will again be held at the facilities of Kap Europa and also with the support of our well established partners of Event lab.

Again we hope to be able to present to you high quality scientific sessions, live surgery, suturing tutorials and also closed comprehensive lessons covering all aspects of obesity treatment for beginners and the advanced care providers.

Together with IFSO and German surgical associations (DGAC and BDC) we will do everything to ensure a high level meeting for all of you from all over the world.

We look forward to welcoming you all again as guests to our well established, traditional meeting at the heard of the Rhein-Main area in the metropolitan City of Frankfurt on the main river.

Dr. Sylvia Weiner

WRITING & PUBLISHING A RESEARCH ARTICLE OF EXCELLENCE (AOE) COURSE

The Medwrite Course can be booked upon availability and will take place in two parts during the following times:

Medical Writing Course Part 1

| November 22, 2018 | 08:30 am – 12:30 pm

Medical Writing Course Part 2

| November 23, 2018 | 08:30 am – 12:30 pm

Chair: Jane Buchwald (Wisconsin, USA)

Price: 50,00 € (incl. 19% VAT)

Target Audience

The course is designed for those involved in medical and basic science research. The course level is appropriate for participants in the early stages of a research career as well as for the more experienced investigator.

Overview

The course provides comprehensive didactic training in the development of science's central document—the research article. The logical construction of each article section is taught, from clarification of the research question through electronic literature review, development of the study design and protocol, and appropriate reporting and interpretation of results. The processes involved in graphics assembly, referencing, and abstract preparation are detailed, and careful attention is paid to the ethics of authorship, funding disclosure, and successful peer-review interaction.

Authors learn to navigate and greatly accelerate article preparation and publication.

SURGICAL SKILLS COURSE

The Surgical Skills Course can be booked upon availability during the following times:
